

Atul Mishra

Staff Software Engineer · AI Systems Builder

Bengaluru, India · +91-9592029280 atulmishra1996@gmail.com linkedin.com/in/atul-mishra-96b4a2a3 github.com/atulmishra1996
atulmishra1996.github.io

AI-native systems builder with 9+ years delivering production platforms at scale. Specialise in autonomous SDLC agents, LLM orchestration, RAG pipelines, distributed backends, and enterprise data engineering. Solo-built **MinionBot** — a full-SDLC AI platform powered by a knowledge graph of the Zinnia codebase (powers Mosaic, Zenius, and code generation; 50+ daily users). Skip-promoted from Senior Software Engineer I to Staff Software Engineer at Zinnia.

EXPERIENCE

Staff Software Engineer

Sep 2024 – Present

Zinnia · Bengaluru, India (On-site)

Skip-promoted from SSE-1 · 2026

Java · Kubernetes · Neo4j · LLM Orchestration · RAG · Tree-sitter · Azure AD · MongoDB

- Solo-built **MinionBot** — full-SDLC AI platform backed by a knowledge graph of the Zinnia codebase. Powers chat (**Mosaic**), QA test suite (**Zenius**), and code generation; scaled from zero to **50+ daily users**.
- Architected 6 independently deployable AI microservices: Tree-sitter indexing, Neo4j knowledge graphs, unified planning pipelines, sandbox validation, and LLM-powered code execution on Kubernetes with Azure AD.
- Co-authored **Mosaic AI** — architecture copilot that makes Zinnia's distributed platform queryable and evidence-backed. [LinkedIn Pulse →](#)
- Built enterprise migration platform moving **400M+ records** from MSSQL to MongoDB — multi-threaded, fault-tolerant, horizontally scalable.
- Delivered RAG-based operational assistant over **50,000+ documents** using MMR, ColBERT, and multi-query retrieval.
- Migrated legacy Camunda workflows to a custom Java orchestration service under sustained high load.

Engineering Lead

Aug 2023 – Aug 2024

xalts · Bangalore, India

TypeScript · Fastify · Java · Spring · AWS · GCP · RabbitMQ · PostgreSQL

- Joined as first backend engineer; grew to own backend, frontend, DevOps, and QA for the CDA no-code financial platform.
- Scaled team from 8 to 30+ engineers — led hiring across backend, frontend, DevOps, and QA.
- Designed distributed systems from scratch: webhook triggers, schedulers, token managers, and indexers.
- Optimised critical CDA execution DB calls by ~70%; built deployment pipelines on AWS and GCP.

WRITING

Introducing Mosaic AI: The Future of Software Architecture Intelligence

Co-authored · LinkedIn Pulse · Jun 2026

EDUCATION

B.Tech — Computer Science

Lovely Professional University

2014 – 2018 · GPA 7.2

President, CYPHER Coding Club

TECHNICAL SKILLS

Languages

Java · TypeScript · Python · Ruby · C++ · C# · Swift

Backend & Frameworks

Spring Boot · FastAPI · Fastify · Rails · Node.js · Next.js · GraphQL · REST

Data & Messaging

PostgreSQL · MongoDB · DynamoDB · Neo4j · Kafka · RabbitMQ · Redis · MSSQL

Cloud & DevOps

AWS · GCP · Azure · Kubernetes · Docker · Terraform · CI/CD

AI & Platform

LLM Orchestration · RAG · Multi-agent · Tree-sitter · Neo4j KG · ColBERT · Azure AD

Leadership

Staff Engineering · Hiring · Architecture · Team Scaling

Senior Software Engineer

Jul 2022 – Apr 2023

Simpl · Bangalore, India

Java · Spring Boot · Python · FastAPI · Kafka

- Shipped Banner Service end-to-end in Java/Spring Boot — personalised promotions at scale.
- Integrated WordPress e-commerce checkout with Simpl's payment flow via Python/FastAPI.
- Reduced consumer lag in Kafka-based event and message management pipelines.

Senior Software Developer

Aug 2021 – Jul 2022

Jisr HR · Remote

Ruby on Rails · Java · Kafka · AWS

- Built Performance Management service from scratch — goals, OKR tracking, and employee review cycles.
- Collaborated with Payroll to optimise HR Attendance API performance.

Software Development Engineer

Sep 2019 – Aug 2021

Zynga · Bengaluru, India

C# · .NET · Unity · Python

- Developed Tropical Escape features and optimised orderboard crafting.
- Shipped Collection Event mini-game — improved player engagement and retention.

Software Development Engineer

Jul 2018 – Aug 2019

Disney+ Hotstar · Mumbai, India

Swift · Objective-C · RxSwift · AWS

- iOS social pod: integrated AsyncDisplayKit, replacing Auto Layout for scroll performance.
- Built leaderboard, scorecard, and voting for IPL & Bigg Boss at tens-of-millions-user scale.

Software Engineer Intern

Aug 2017 – Jun 2018

ClearTax · Bengaluru, India

Ruby on Rails · Python

- Built Autopivot (Rails) integrated with Pivotal Tracker for sprint tracking.
- Python scraper monitoring government websites with change notifications.

ACHIEVEMENTS

- 🏆 Google Code Jam 2017 — Qualification Round
- 🏆 CodeChef SnackDown Pre-Elimination (2016 & 2017)
- 🏆 1st Place — Code Samurai & Code Manthon, LPU
